The methodology of the brand valuation is based on the evaluation of activity of the companies brand-owners, and also takes into account several factors that reflects the market conditions that could influence the brand, all possible threats and perspectives for industries development.

Generally it is based on analysis of factors influencing the market value of the brand: the company's position on market, consumer value of brand, as well as a factors of actual trends for company and its industry. The brand value includes only the cost of the brand (name), excluding production facilities, infrastructure, patents, inventions and other tangible goods or intellectual property.

Brand value calculation formula: $V = Fc * (Iq * Gq * Tq * Cq) * Uid$

V – brand value

Fc – composite financial index

Iq – investment index

Gq – geographical index

Tq – technological index

Cq - competitive index

Uid – unique identity index
